JFC International (Europe) - Data Security Incident

JFC International (Europe) was recently subject to a ransomware attack that briefly disrupted its IT systems. A full forensic investigation by in-house specialists together with external cyber experts was immediately started and is underway. Normal conduct of business in Europe will be up and running after a brief interruption for security reasons. The affected servers were secured.

JFC International (Europe) is cooperating closely with the relevant authorities. Employees and business partners were informed as soon as possible.
